Lewis Marshall

I am an organised, punctual, motivated and reliable person. I take a logical and methodical approach to work, and aim to complete tasks within the required timescale and to a high standard. I strive to develop my skills and knowledge further through practical experience and study.

Work Experience

Web Developer

Luxinar

July 2017 to October 2020

Developer for a Laser manufacturing company where my role was to develop a new version of an internal web application used all around the company.

- Developed the new internal web application using ember.js, node.js & MongoDB.
- Designed a web interface for the latest laser products displaying diagnostics information and was developed using jQuery.
- Showed presentational demos of new or improved applications to business users taking feedback.
- Provided training for other developers with ember.js, node.js & MongoDB.
- Worked using the waterfall environment method.
